

Pull out the tent from his bag.

Roll out Inner and Fly

Lay out the Fly and put the poles into the sleeves.

Insert the pole tip in the metal buckle on a side

Carve the poles and then block it from the other side

Pull up the structure

Secure the cord with the pegs first in the front then in the rear

...also for the sides

Lay out the inner under the Fly

Secure the rear corners of the inner to the fly

Pull up the inner inserting the toggles in the relative eyelets

Continue the previous operation for the remaining sections

Close the internal dividers

Lock on the vestibule cord to the front pegs
